

# The 2015-2016 Fairchild Challenge GREEN CUISINE MEALS FOR SPACE EXPLORATION

Saturday, April 9, 10:00 AM - 2:00 PM  
The Garden House at Fairchild Tropical Botanic Garden  
during our Spring Garden Festival

Scientists at NASA are experimenting with food plants in space. As we determine better plant cultivars for space and new technology, we need new recipes for tasty and nutritious food that can be grown under conditions similar to those on the International Space Station.

Join us as middle and high school students present their culinary creations using plants that may one day be grown in space.

**THIS EVENT IS OPEN TO THE PUBLIC**

**Garden admission is free to students, parents, teachers and supporting friends.**
